Subject: Sustainable Water Management Initiative

Dear Kathleen,

I'm not going to make your eyes glaze over with a copied boiler plate. I'm asking you to do the right thing and be a steward of our watersheds and not perpetuate our throw-away society. Our waters need to be protected and not exploited to the point where they are destroyed. Please be thoughtful in your safe yield recommendations. They are too high now and need to be reduced so we can have clean clear flowing waters here in Massachusetts.

Sincerely,

John LeJeune
Gloucester, Mass.
